

TECHNICAL SPECIFICATIONS

- Diameter: 74 mm / 2,91"
- Height: 141,2 mm / 5,55"
- Weight: 39 g / 0,086 lbs

MATERIALS

- Bottle cage obtained by injection moulding and made in polymer matrix composite material reinforced with highly resistant glass fiber.

FEATURES

Ala is Elite's bottle cage made in highly resistant fibre-reinforced material (FRP). Characterised by an elegant and dynamic design, **Ala** has been created to ensure comfort when handling the bottle and great retention on steep roads.

AN ELEGANT DESIGN FOR MAXIMUM BOTTLE RETENTION

Available in 5 graphic designs with a strong aesthetic impact, the **Ala** bottle cage features an elegant and modern design, created to make it easier and more ergonomic to extract and insert the bottle, even when there's not much room on the frame. The new design features two wing-shaped arms connected in the front, created to

envelop the bottle in its upper part, thus enhancing the retention abilities of the bottle under any circumstance, such as high speed descents or off-road courses.

RESISTANT AND LONG-LASTING MATERIAL

Lightness and mechanical resistance are the main features of the Elite bottle cages made in certified fibre-reinforced material (FRP), ensuring not only top performances and retention under any circumstance, but also a really long product life.

LIGHT

Weighing only 39 g, this bottle cage ensures lightness yet maintains reliable performances thanks to its variable sections structure based on the tensions applied to said sections of the bottle cage during use.

IDEAL FOR NEXT-GEN BYCICLES

Perfectly suited for next-gen bicycles and also for smaller sloping frames (with reduced central triangle).
