

TECHNICAL SPECIFICATIONS

- Diameter: 74 mm / 2,91" (± 2)
- Height: 148 mm / 5,82"
- Weight: 57 g / 0.12 lbs

CONSTRUCTION MATERIALS

- High-strength fiber-reinforced material.
Product obtained through injection molding with a polymer matrix material.

FEATURES

Ambo is Elite's new side-entry bottle cage that allows you to **insert the bottle from either the right or left side**, thanks to its reversible design. This unique feature provides an unprecedented level of customization for your accessories, allowing you to prepare for your rides just the way you like.

The **cage can rotate 180°**, giving you the freedom to **choose the direction of bottle insertion**. Whether you're engaged in mountain biking or participating in competitions, **Ambo** ensures easy access to your liquids without compromising on comfort.

The **adjustable rear section, both vertically and laterally**, ensures a **secure fit** on the bike, offering the ability to **customize the**

angle of bottle insertion.

Ambo is intelligently designed to adapt to your frame's dimensions and size, providing **exceptional grip in any riding situation**.

180° ROTATABLE CAGE

Ambo allows you to **customize the orientation of bottle insertion** thanks to a reversible structure consisting of a **main cage that can be rotated by 180°**.

This unique feature allows you to choose the direction of **bottle insertion on the right or left** according to your preferences and convenience, making bottle management on the bike practical and easy.

This functionality is especially useful for mountain bikers and gravel bikers who have bicycles with **reduced central triangle frames** and often travel with **bikepacking bags** that reduce the available space for bottle insertion on the frame.

ADJUSTABLE REAR SECTION

The **separate rear section** can be mounted **higher or lower** on your bike's mounting holes. This adjustability ensures a **perfect fit for the bottle** inside the cage, providing a **secure hold** even on rough terrains and challenging conditions.

LATERAL ADJUSTMENT

The rear section features **two slots** that allow you to mount the bottle cage on the outermost part of the mounting tube. Simply **slide the cage into the corresponding slot** on the right or left side and secure it from the selected position.

This allows you to slightly tilt the main cage and **adjust the angle of bottle insertion or extraction**, ensuring comfortable access in any cycling situation. Customize the bottle management based on your frame's size and shape with this convenient feature.

MAXIMUM COMFORT WITH A PATENTED DESIGN

Ambo boasts a patented design that not only offers the customization options mentioned above but also allows for **easy lateral and top insertion and extraction** of the bottle. With **Ambo**, you can focus solely on the ride, knowing that accessing your bottle is both convenient and effortless.

DURABLE AND LONG-LASTING

The structure made of certified fiber-reinforced material (FRP) is **solid and resistant** to shocks, vibrations, and weather conditions, ensuring an extremely long product life even in extreme cycling conditions.
