

TECHNICAL SPECIFICATIONS

- Diameter: 74 mm / 2,91"
- Height: 150 mm / 5,90"
- Weight: 81 g / 0,18 lbs ($\pm 10\%$)

MATERIALS

- Aluminum.
- Equipped with anti-vibration lateral buttons with gel inserts that hold the bottle tightly.

FEATURES

Ciussi Gel is the result of Elite's vast experience accumulated through the years thanks to its collaboration with the professional cycling world, both road and MTB.

The inclined design of the lateral buttons eases the introduction and removal of the bottle even on frames with small dimensions.

The large surface of the internal buttons and the soft material used guarantee a firm hold on the bottle even in extreme conditions (just think of the pavé of the northern European

Classics or the MTB rough terrain) guaranteeing a cushioning action between bottle and bottle-cage and reducing the diffusion of the vibration on the bicycle frame.

The welding is done with TIG technology and the 130 mm / 5,12" of surface enables the cage to be strongly resistant to lateral impacts.

Particular **attention has been given to the details of the components like the external part of the lateral buttons which are chromed polished and the two Elite logos which are hand painted.**
