

DATI TECNICI

- Capacity: 550 ml / 20 oz
750 ml / 26 oz
950 ml / 32 oz
- Diameter: 74 mm
- Height: (550 ml) 187,5 mm / 7,38"
(750 ml) 228 mm / 8,98"
(950 ml) 267 mm / 10,51"
- Weight: (550 ml) 67 g / 0,15 lbs
(750 ml) 71 g / 0,16 lbs
(950 ml) 81 g / 0,18 lbs
- Maximum liquid temperature 40°C/ 104°F.

MATERIALS

- Bottle body: PP + plastomer.
- Cap: PP.
- Valve: TPE + PP.
- Protective cap: PP.

FEATURES

Fly Elite, world's lightest bottle, used by the best WorldTour champs, introduces a new model, designed to be used on MTBs, with a practical protective cap to ride on the roughest, dirtiest courses in total safety and hygiene.

RECORD LIGHTNESS

The Elite Fly is WorldTour's champions'

most used bottle because it's **extremely lightweight**.

With a weight of only **51 g**, we were able to **reduce by an additional 5.5%** of the weight from the bottle as compared to prior versions, which is a significant reduction in plastics at greater manufacturing volumes. Another step towards our goal of minimising the utilisation of raw resources during the manufacturing process.

LESS PLASTIC, ONLY PERFORMANCE

Elite firmly believes that each athlete is responsible for taking care of the world and the environment everyone rides in. In developing our products and implementing new sustainable manufacturing processes, we consider both materials and technologies. That's why we're proud to use over **30% less plastic than average** to create one single bottle of the Fly range.

By making our Fly Tex bottles so lightweight by design, we can significantly reduce our carbon footprint and help ease pressure on the environment by ensuring the lowest CO₂ emissions from our production of water bottles.

UNIQUE DESIGN

The bottle features a new and immediately identifiable sport-like design with a new texture designed to improve grip on the bottle, which is sweet when you're riding your

bike.

Its standard **74 mm diameter**, allows you to use it on all traditional bottle cages available on the market.

INNOVATIVE MATERIAL

The **exclusive odourless, soft and resistant plastic material**, a staple of the whole Fly bottles range, is the result of a 3-year long experimental research project conducted by Elite in cooperation with various Universities Research Center.

That's what made it possible to employ an innovative plastic material, designed to maintain unaltered the taste of the liquid it contains.

PERFECT FOR MTB

Fly MTB is a **really versatile product, designed to offer mountain bikers a very light, performing and resistant bottle**, to use without worrying about the cleanliness of the push-pull valve. Adding a detachable **transparent plastic cover for the cap** protects the bottle from dust, mud and other external agents that might land on the spout while riding the MTB on rocky, off-road paths.

MAXIMUM HIGH-LIQUID FLOW

The cap has an **ergonomic design** and it is **multi-material made**. It guarantees an

increased and easier liquid flow thanks to the valve which is soft, odorless and will not alter the taste of the liquid.

It is ideal for competitions as it features:

- _a larger push-pull soft valve for maximum ergonomics and ease of opening and closing while cycling;
- _quick and easy unscrewing to clean and refill the bottle.

IDEAL GRIP

The surface of the bottle's body features a special grip which makes it safer and easier to use under all conditions (competitions, off-road...).

SQUEEZABLE

Bottle body is very soft and **liquid flows easily** by just applying a light squeeze.

EXCELLENT CAPACITY

While featuring a **more compact design**, the bottle **provides an optimal 550 ml** supply of liquid during the race with reduce encumbrances, particularly useful on sloping frames or when two bottle cages are mounted on the bicycle.

CONVENIENCE OF USE

The bottle is equipped with a **20% increased opening compared to standards** for easier filling with liquids and/or powdered supplements, also making bottle washing easier.

FOOD CONTACT CERTIFICATION

All our water bottles are made from **100% FDA food-grade materials** and **comply with European CE regulations** governing food-grade materials.

BPA FREE

Bottle components are totally **BPA-Free** (Bisphenol A).

RECYCLABILITY

The materials used are **recyclable** through standard recycling streams.
