

TECHNICAL INFO

• DIMENSION:

Bottle capacity: 350 ml / 11,84 oz
 Bottle diameter: 66 mm / 2,60"
 Height: 164,3 mm / 6,47"

• WEIGHT:

Bottle: 55 g / 0,12 lbs
 Bottle cage: 34 g / 0,075 lbs

MATERIALS

- Bottle body: PE.
- Cap: PP.
- Valve: TPE + PP.
- Bottle cage: Fibre-reinforced material (FRP)

BOTTLE FEATURES

IDEAL FOR BIKES WITH SMALLER FRAMES

The Jet 350 ml bottle is designed to be used on **smaller-sized bikes** featuring smaller frames.

Featuring **new eye-catching artworks**, these bottles are also inspired by Pro Teams' bottles and equipment.

ERGONOMIC

Smaller than the average size, this bottle features a **66 mm diameter** compared to the traditional 74 mm size. The shape of its upper section is smaller so holding the bottle is much easier.

SQUEEZABLE

Soft bottle body for easier liquid flow.

PRACTICAL AND HYGIENIC

Its **wide bottle mouth** makes it easy to fill it up with beverages or supplements and clean it afterwards.

PUSH-PULL CAP

Makes it easy to:
 _open and close soft rubber push-pull cap;
 _ensure copious liquid flow;
 _open and unscrew to clean and refill it.

BIODEGRADABLE MATERIAL

The bottle is manufactured with an innovative plastic material treated with a **special additive** that makes it possible to **lower the time it takes for the bottle to decompose** when entering the regular industrial composting cycles.

Thanks to this additive, the microorganisms responsible for the biodegradation of materials attack the polymeric chain of the plastic, thus

significantly reducing the time it takes for the bottle to degrade (3 months to 5 years). This is something that regular plastic products cannot do (they usually take 100 to 1000 years to decompose).

FOOD SAFETY

Made in polyethylene, it's food safe according to current legislation (EC, FDA, Canadian, Japanese and Chinese regulations).

BPA FREE

All materials are **totally BPA (Bisphenol-A) free**.

COMPATIBLE WITH CEO BOTTLE CAGE

Elite has developed a line of bottle cages with **smaller diameter (66 mm)** compared to the standard diameter, so it's safer on the bike.

BOTTLE CAGE FEATURES

RESISTANT

The certified **fiber-reinforced (FRP) material** structure ensures exceptionally long product life.

SUPERIOR FINISH

The **accurate design**, the attention to detail, the **exclusive paint and the new aggressive**

look ensure a finish for the **Ceo** that's superior to all competition's products.

AERODYNAMIC AND ELASTIC

The shape of the bottle cage is similar to an exceptionally performing product that Elite manufactured in the past, the Patao, though adapted to 66 mm diameter bottles.

The elongated shape of the **Ceo** bottle ensures a firm grip on the bottle itself.

WIDE RANGE OF ADJUSTMENTS ON THE BICYCLE

The shape on the fixing holes of the frame ensures a **wide range of adjustments of the bottle cage on the vertical and down tubes**. It's not just ideal for the bicycles of young sportsmen and sportswomen, it's also for bicycles that can't fit a standard bottle cage.

THIS PRODUCT IS NOT A TOY.

TO BE USED UNDER THE SUPERVISION OF AN ADULT.

THIS PRODUCT IS INTENDED FOR USE BY CHILDREN OVER 13.
