- Weight: 211 g / 0,46 lbs
- We recommend washing it by hand.

MATERIALS

- Bottle entirely made of AISI 304 stainless steel.

BOTTLE FEATURES

ELITE AND COCA-COLA PLASTIC-FREE BOTTLE

Elite's stainless steel **Mia** bottle, totally plastic-free, wears the **official Coca-Cola design** for a beautiful, limited edition collectible product, perfect for sports and everyday use.

TOTALLY MADE IN STAINLESS STEEL, FROM ITS BASE TO ITS CAP

Mia is ELITE's first bottle that features no **plastic material whatsoever**, from its base to its cap.

Totally plastic-free and easy to wash, **steel bottles** are a great investment to hydrate while cycling and in everyday life, when you're

working or when you go to the gym. A steel bottle is also a conscious, **eco-friendly choice**: steel is one of the easiest to recycle materials and these bottles can be used for years on end.

TOTALLY URBAN STYLE, TOTALLY COCA-COLA STYLE

In its chrome and red colors, the **Mia Coca-Cola** series of bottles is distinguished by the iconic style of the most beautiful Coca-Cola bottles that made the design history of the product and the practicality of an avant-garde project: thanks to the innovative **cap with a handle for transportation**, totally made of steel, you'll be able to carry your bottle only with a finger and keep your hands free to transport other objects, answer your phone or walk unencumbered.

The hook has been designed by our team of designers to take into account the weight of the bottle contents and always keep it in place while transporting it.

STURDINESS AND DURABILITY

Bottle's steel and the specific modes it's manufactured ensure **efficient thermal performances and durability** for a long time.

CLEAN & FRESH WATER FLOW

Unlike plastic materials used for traditional bottles, **steel never alters the organoleptic**

properties of the liquid, so the original taste is maintained inside the bottle for even longer.

COMPATIBLE WITH ALL BOTTLECAGES

Mia Coca-Cola is compatible with all commercially available bottlecages. This bottle's external diameter measures **73 mm** on its base, thus ensuring a universal fit in any bottlecage.

The upper area of the bottle body decreases to 71 mm, so it's easier to insert and extract from the bottlecage and gives it a more sophisticated look, perfect for an everyday-use bottle.

HYGIENIC AND SAFE

Steel is a safe, hygienic and easy to clean material: just fill the bottle with hot water and a drop of neutral detergent, shake it and empty the bottle, rinse repeatedly and let it dry. Totally **BPA-free** (bisphenol A), AISI 304 stainless steel is **food safe** according to current legislation (EC and FDA).

RECYCLABILITY

Steel is an infinitely **recyclable material**, that's why it's the most recycled worldwide.
