

TECHNICAL DATA

- Diameter: 96 mm / 3,78"
- Height: 139 mm / 5,47"
- Weight: 207 g / 0,46 lbs

CONSTRUCTION MATERIALS

- Main body: Tritan
- Support grid: Tritan
- Rubber ring: Silicone

SPECIFICATIONS

Neto is the Elite's **steam sterilizer for plastic bottles**.

The sterilization cycle lasts **only 1 minute** in the microwave to **kill 99.9% of bacteria and molds** on each component of the bottle with **water vapor**.

The steam kills the bacteria without using any chemicals.

Compact and modular, **Neto** fits all standard water bottles.

A BOTTLE STERILIZER TO USE IN THE MICROWAVE

It is essential to take care of the **sanitization** of the things we use every day, and **water bottles** are no exception.

Bacteria, fungi and molds can thrive in constant moist environments, especially when you take sugars and supplements through your bottle. You should always wash and sanitize your bottles carefully. **Neto** helps you do this quickly and effectively.

This bottle sterilizer is designed to sanitize all parts of your water bottle by action of wet steam. Just fill **Neto** with plain water up to the level limit and **put it in the microwave for 1 minute at 700 watts**. It will **kill 99.9% of molds and bacteria** for proper and safer use of your bottle when you're riding your bike.

The operation is simple: for sterilization to occur, steam must penetrate every part of the water bottle and remain in contact with every surface for a certain period of time without dispersing. This is where **Neto** comes into play, which takes advantage of the **steam generated by the increase in water temperature** without dispersing it to sanitize every part of the water bottle.

INNOVATIVE DESIGN, FITS BOTTLES OF DIFFERENT SIZES

Neto includes a sanitizing cup equipped with a silicone ring to facilitate the insertion of **bottles of different diameters**. It also includes a support grid to comfortably place each part of the bottle, such as the cap and the valve.

The innovative **inclined shape** makes for an easy use of the **Neto** with standard 550 ml and

750 ml bottles in almost all microwave ovens on the market.

We recommend that users **check the size of their microwave** oven to verify that the product with the bottle inserted fits their microwave.

DURABLE AND EASY TO WASH

Neto is easy to wash and dry because it's modular. Simply rinse the product and its parts with water and common detergents like dishwashing liquid, and let each part dry thoroughly.

The body of the sanitizing cup is made of **Tritan**, which is a **100% recyclable material**, it's **very resistant**, and **provides greater thermal properties**. Particularly suitable for making containers for water, Tritan is ideal for use in microwaves thanks to its durability even at high temperatures.
