

TECHNICAL DATA

- Open in use:
380 x 240 x 420 mm / 14,96" x 9,45" x 16,53"
- Folded not in use:
380 x 240 x 140 mm / 14,96" x 9,45" x 5,51"
- Weight: 2.5 kg / 5.51 lbs

MATERIALS

- Nylon PS10.

FEATURES

TRIATHLON RACE DESIGN

Tri Box safely and securely manages your Triathlon gear during and after competition. It is **efficient, ergonomic and practical** and combines the unique attributes of athletic bags and backpacks into a single design for all athletes.

SPECIFICALLY DESIGNED FOR TRIATHLON/ DUATHLON COMPETITIONS

Designed, developed and crafted from the race experience of triathletes/duathletes, both amateur and pro.

DESIGNED FOR SPEED

The ergonomic and strategic position of tools **reduces time spent in the transition area,**

so the athlete can focus on only improved performance.

EASY TO TRANSPORT

Tri Box can be transported like a backpack to the transition zone (on or off the bicycle) while preserving the neat organization of the contents. Avoid the confusion that too often happens in the transition.

SUPER COMFORTABLE

Designed for the highest level of comfort during transport with **many soft-to-the-touch expansion inserts.**

This eliminates uncomfortable weight shifts on back and shoulders, which also remain dry.

Includes a practical upper handle for easier transport.

CUSTOMIZABLE TO MEET THE ATHLETE'S NEEDS

The **Tri Box** can be used in **4 different ways**, based on the athlete's specific requirements or the characteristics of the transition zone (to be used in accordance with the competition's regulations):

STANDARD SETUP

Ideal for triathletes that do not take part in numerous events but still prefer to preserve the organization of their gear.

Just open the upper lid by rotation, remove

the 2 bags (cycling and racing bags) and hang them in front of the Tri Box by their velcro strips, and all gear will be neatly organized.

PRO SETUP

Ideal for pro triathletes that need to prepare their transition zone as quickly as possible. **Just open the upper lid by rotation, remove the 2 bags (cycling and racing bags), remove the T1 bag, hang cycling shoes on the bicycle, insert the empty T1 shoe-carrying bag and hang the T2 shoe-carrying racing bag in front of the Tri Box.**

LITE SETUP

Very useful when the transition area is cramped. **Just remove the upper lid and place it on the bottom, remove the 2 bags (cycling and racing bags) and place them in front of the Tri Box, unzip the 4 side zippers halfway and fold their sides by placing their edges on the lid previously placed on the bottom.** This halves the bag's volume but still allows all gear to be arranged in a neat and efficient way.

LITE PRO SETUP

Designed for advanced triathletes that cannot find enough room in the transition area. **Just remove the upper lid and place it on the bottom, remove the 2 bags (cycling and racing bags), remove the T1 bag, hang**

cycling shoes on the bicycle, insert the empty T1 shoe-carrying bag and hang the T2 racing bag in front of the Tri Box. Then just unzip the 4 side zippers halfway and fold their sides by placing their edges on the lid previously placed on the bottom. This creates less clutter but still efficiently organizes gear for quick use.

QUICK TO USE, EXCELLENT GEAR PROTECTION

The additional light-grey waterproof lid, with integrated velcro strips, lets you open the bag in a single gesture. This feature is specifically designed for weather protection, and to access gear as quickly as possible without the use of buttons or buckles.

INSTANTANEOUSLY LOCATED

Includes a transparent pocket cardholder that can display a team's or athlete's nametag for immediate recognition inside the transition area.

SHOE-CARRYING BAG

Tri Box includes two sturdy and practical bags that fold up as one and arrange shoes in a simple, practical, and intuitive way to reduce transition times.

It also includes a towel, attached to the bag by a velcro strip, to dry your feet during transitionis when nessessary.

GEAR BAG

Tri Box includes a quickly foldable gear bag that stores your wet or dry gear.

INSIDE COMPARTMENT OPTIMIZATION

Two internal separators organize materials and separate wet from.

GEAR POCKETS

Tri Box has numerous pockets to organize the gear that a triathlete needs during competition:

External Front Pocket: located on the front, always accessible and handily stores documents or personal data;

External Side Pockets: located on the sides with practical retentions systems; useful for safely holding bottles, creams, food, supplements or other items that need to be quickly accessed;

Internal Side Pockets: located on the internal walls, they feature a double zipper (upper and lower) for easy access when the bag is full or halved;

External Upper Pocket: located outside the upper lid, includes an efficient elastic rope retention system for helmet transport.

When not in use, Tri Box can be completely folded by unzipping the zippers to the full, so as to reduce the bulk to 1/3 compared to when it is in use, which is convenient when travelling, at home or in the locker room.
