TECHNICAL SPECS

- Diameter: 74 mm / 2,91"
- Total height: 155 mm / 6,10"
- Weight: 25 g ($\pm 10\%$) / 0,055 lbs

MATERIALS

- PA + Carbon fiber.

FEATURES

Vico Carbon expands the range of ultra light Elite composite material reinforced with carbon fiber bottle cages with unique technical features and an elegant patented design.

PATENTED DESIGN

The new patented design enhances the bottle cage with a firmer grip even in extreme conditions, as well as easier and smoother bottle insertion/removal.

ULTRA-LIGHTWEIGHT

Weighing only 25 g, it features structural sections that vary according to the tension level applied to different areas of the bottle cage during use, ensuring high reliability and performance.

INNOVATIVE COMPOSITE MATERIAL

An innovative carbon fibre composite material provides extreme lightness and durability while maintaining the same level of performance over long periods of time.

SECURE BOTTLE RETENTION

The new design features a front structure that wraps the bottle higher up to improve bottle retention even in challenging conditions, such as high-speed descents, rough terrain or off-road paths.

QUICK AND EASY BOTTLE INSERTION AND REMOVAL

A unique shape makes it easy and safe to insert and remove the bottle with just a simple move, so you won't be distracted from the road ahead during your rides.

TESTED AND DEVELOPED WITH THE WORLD'S BEST PRO TEAMS

Many years of races and victories with the world's best professional teams have helped us design, test and create a bottle cage that will meet the expectations of even the most demanding cyclists.

SUPERIOR FINISH

Precise design, full attention to detail, exclusive paint and new edgy graphics lend the Vico Carbon bottle cage a superior finish that makes it stand out from the competition.

IDEAL FOR CUTTING-EDGE BIKES

A unique design and edgy graphics makes this bottle cage perfect for cutting-edge bikes and also **ideal for small sloping frames with smaller central triangles.**

WIDE RANGE OF PLACEMENT OPTIONS

The shape of the mounting holes ensures a wide range of placement options. **Mount one on the seat tube and one on the down tube to carry two bottles at the same time, making sure you have enough water to get you through your trip.**
